

CHANDAN KUMAR THAKUR

PHP + Laravel Full-Stack Developer

+91 8002293615 | tchandankumar2004@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

PHP + Laravel Full-Stack Developer with practical, hands-on experience building real-world, database-driven web applications and REST APIs. B.Tech (Computer Science & Engineering) graduate (CGPA: 8.54) who has independently designed, developed, and deployed 4 live full-stack platforms using PHP, Laravel, and MySQL — implementing secure authentication, role-based access control, admin dashboards, and third-party integrations such as Razorpay and the WhatsApp API. Comfortable across the full SDLC, from database design and REST API development to building responsive, production-ready interfaces.

TECHNICAL SKILLS

- **Backend Development:** PHP, Laravel, MVC Architecture, REST APIs, OOP
- **Frontend Development:** JavaScript, HTML5, CSS3, Bootstrap, Flutter (mobile UI)
- **Database:** MySQL, Database Design, CRUD Operations
- **Authentication & Security:** Authentication & Authorization, Role-Based Access Control (RBAC), JWT/OAuth
- **Integrations & Automation:** Razorpay Payment Integration, WhatsApp API, Email Notifications, Laravel Scheduler
- **Tools & Practices:** Git, GitHub, VS Code, XAMPP, Laragon, SDLC, Agile Methodology

PROFESSIONAL EXPERIENCE

MrSalonix — Online Salon Appointment Booking Platform | Laravel, PHP, MySQL, REST API Jun 2026 – Present

- Designed and developed the Laravel/PHP backend for a full-stack salon appointment booking platform, building REST APIs consumed by a Flutter frontend to connect customers with nearby men's, women's, and spa salons.
- Designed the MySQL database schema and implemented CRUD operations for salons, services, staff, and bookings, along with real-time time-slot selection logic.
- Built role-based dashboards (Customer, Salon Owner, Admin) using RBAC, and implemented secure authentication (JWT/OAuth) with booking status tracking across all roles.
- Published a companion Android app on the Google Play Store. **Live:** [mrsalonix.com](#) | **App:** [MrSalonix on Play Store](#)

TheSchoolTech — Computer Trainer Hiring Platform | Laravel, PHP, MySQL, Razorpay, Bootstrap 5

- Built a multi-role Laravel platform (Admin, School, Trainer) with secure authentication, RBAC, and MVC architecture, supporting a 1–3 month trainer booking workflow for private schools across India.
- Integrated the Razorpay payment gateway for secure fee collection and automated booking completion using the Laravel Scheduler.
- Designed the MySQL database and implemented trainer profiles, demo video uploads, a rating system, and automated email notifications. **Live:** [theschooltech.com](#)

DeepakCosmetic — E-Commerce Website | Laravel, MySQL, WhatsApp API

- Developed a full Laravel-based e-commerce platform with CRUD-driven product management, shopping cart, checkout, and order tracking backed by a MySQL database.
- Integrated the WhatsApp API for automated order notifications and real-time customer communication.
- Built a secure, role-based admin dashboard for inventory management, order handling, and customer data management. **Live:** [deepakcosmetic.com](#) | **App:** [Deepak Cosmetic on Play Store](#)

Mithilanchal NTT — Nursery Teacher Training Institute Website & Management Platform | Laravel, PHP, MySQL

- Designed and developed a production-ready Laravel-based website for Mithilanchal Nursery Teachers Training Centre, Darbhanga, with responsive public pages for courses, eligibility, training, gallery, FAQ, admission, and contact information.
- Developed a custom Laravel admin dashboard with CRUD-based management for Courses, Offers, Gallery, Testimonials, Announcements, Enquiries, and Institute Settings.
- Designed the MySQL database structure and implemented Laravel migrations, authentication, protected admin functionality, image uploads, public storage, enquiry handling, and email notification workflow.
- Deployed and configured the application on Hostinger for production, including Composer dependencies, MySQL database, Laravel storage symlink, Vite production assets, environment configuration, caching, and deployment troubleshooting. **Live:** [mnttcdbg.com](#)

PROJECTS

Employee Attendance & Management System | PHP, MySQL, Bootstrap

- Built a secure, multi-role attendance and employee management system using core PHP with MVC-style structuring and CRUD operations for employee, attendance, and role data.
- Implemented BCRYPT authentication, session handling, and RBAC-based dashboards for enterprise workforce management.
- Optimized MySQL queries and built reporting modules to automate performance tracking.

StyleNext — Smart Salon & Grooming Application | Flutter, Firebase, Dart

- Developed a full-stack mobile salon booking app with Firebase Authentication and role-based access control; published a related research paper, “StyleNext: Your Appointment Just a Tap Away” (IJCT Volume 12, Issue 6). [View Paper](#)

EDUCATION

B.Tech, Computer Science & Engineering — AKTU, Lucknow | CGPA: 8.54

2022 – 2026

Class XII — BSEB, 72% (2021) Class X — CBSE, 69.6% (2019)

CERTIFICATIONS

- Cybersecurity Foundations – Google

ACHIEVEMENTS

- Created educational programming content on YouTube, organically reaching 150+ learners — [youtube.com/@jpccoder](#)
